

C:/Users/YunJun/Documents
/chat-server/LogonServer
/LogonPacketDispatcher.h

```
graph BT; A["C:/Users/YunJun/Documents  
/chat-server/LogonServer  
/LogonPacketDispatcher.h"] --> B["C:/Users/YunJun/Documents  
/chat-server/LogonServer  
/LogonPacketDispatcher.cpp"]; A --> C["C:/Users/YunJun/Documents  
/chat-server/LogonServer  
/LogonServer.cpp"];
```

The diagram illustrates the relationship between three files in a project. At the top is a header file, `LogonPacketDispatcher.h`, which is included by two source files below it: `LogonPacketDispatcher.cpp` and `LogonServer.cpp`. The header file box is shaded gray, while the source file boxes are white. Blue arrows point from each source file box up to the header file box.
