

C:/Users/YunJun/Documents  
/chat-server/LogonServer/pch.h

```
graph TD; A["C:/Users/YunJun/Documents  
/chat-server/LogonServer/pch.h"] --> B[iostream]; A --> C["boost/log/trivial.hpp"]; A --> D["boost/winapi/basic  
_types.hpp"];
```

The diagram illustrates the dependencies of a precompiled header file. A central box at the top represents the pch.h file, which includes three other files: iostream, boost/log/trivial.hpp, and boost/winapi/basic\_types.hpp. Arrows point from the pch.h box to each of these three files, indicating that the pch.h file includes them.

iostream

boost/log/trivial.hpp

boost/winapi/basic  
\_types.hpp
