

LogonODBCObject::CreateUser

ChatODBCObject::GetUserName  
UsingToken

ODBC::Fetch

```
graph LR; A[LogonODBCObject::CreateUser] --> C[ODBC::Fetch]; B[ChatODBCObject::GetUserName UsingToken] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'LogonODBCObject::CreateUser'. The bottom box contains the text 'ChatODBCObject::GetUserName' followed by 'UsingToken' on a second line. On the right, there is a gray rectangular box with a black border containing the text 'ODBC::Fetch'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both functions call or depend on the 'ODBC::Fetch' operation.
